Architecture

Using SanDisk Cruzer Blade

Perform the following steps to install the USB drive on your system:

1. Locate your device's USB port.
2. Insert the flash drive into the USB port.
3. Click the pop-up dialog box to open the flash drive.
4. Copy and paste files to the drive.

What to do next: After transferring your files to the flash drive, safely remove the device.

Note: To avoid possible loss of data, select the **Safely Remove External Device** option to eject the flash drive.

Troubleshooting and Frequently Asked Questions

Question: The USB device does not show up on my device

Solution: Check for damaged ports. Also, try to insert the device into multiple ports.

Question: How can I format my flash drive?

Solution: Right-click on the drive and select **Delete** from the dropdown menu.

Question: Can I use SanDisk Cruzer Blade on multiple operating systems?

Solution: The SanDisk Cruzer Blade flash drive is supported on Windows, Linux, and MacOS.
